DIVERSIFIED PLASTICS INC. INTRODUCES NEW EQUIPMENT AND FACILITY ADDITION

Latta, SC - December 19, 2018 - Diversified Plastics Inc., a leading international rotational molder based out of Latta, South Carolina, introduces new equipment and an addition to their facility.

Diversified Plastics will soon be introducing new equipment to their facilities that include a new rotational molding oven from Ferry Industries, Inc. and a robotic cell from Advanced Integration Technology, LLC.

The implementation of a new rotational molding oven will increase productivity and allow DPI to produce larger quantities of their plastic products. This is especially necessary since Diversified Plastics has recently introduced a new product line of plastic steps that can be used for spas, pools, boats, and workshops.

The robotic cell will assist in the trimming process of the products at the facility. The capabilities of the robotic cell allow the trimming process to be completed more consistently, safely, and efficiently with less scrap. The robot will be used to trim high production products, such as the plastic spa steps.

Diversified Plastics will also be adding over 18,000 sq. ft to their current facility to house the new rotational molding oven and robotic cell. This building expansion will accommodate the growth of the company's new product lines as well.

"We are eager to introduce this cutting-edge technology to our facility. The new rotational molding oven and robotic cell will help us to manufacture our plastic products more efficiently and allow us to expand our product lines. The addition to our facility is necessary to accommodate the growth of our company." states Tommy Wallace, President of Diversified Plastics.

Since 1976, Diversified Plastics has been the leading rotational molding manufacturer of custom and standard material handling carts and plastic storage containers. DPI specializes in material handling carts for the industrial, textile, hospitality, laundry, agricultural and marine industries, plus waste and recycling plastic containers for restaurants, sports venues and stadiums, apartment and condominium complexes, and corporate offices.

In addition to providing custom material handling solutions and waste containers for any application, DPI's diverse product assortment includes bulk material handling carts, plastic utility carts, laundry carts, bulk containers, tote boxes, round containers, spring platform trucks, elevated carts, easy access carts, tilt trucks and more.
