DIVERSIFIED PLASTICS INC. INTRODUCES NEW ROBOTIC CELL

Latta, SC- March 21, 2019 - Diversified Plastics Inc., a leading international rotational molder based out of Latta, South Carolina, introduces a new robotic cell to their manufacturing facility.

This robotic cell was created by Advanced Integration Technology, LLC. The machine will assist in the trimming processes at the facility. The capabilities of the robotic cell allow the trimming to be done safely and more efficiently with less scrap. This manufacturing process can be dangerous, so the robots can complete this in a safer manner than a human.

Robots from Advanced Integration Technology have the ability to auto adjust to accommodate multiple shaped parts at different dimensions, allowing the robot to assist in the production of many different product lines.

Diversified Plastics has added over 18, 000 sq. ft to their current facility to house the new robotic cell and new rotational molding oven. This building expansion will accommodate the growth of the company's new product lines and custom rotational molding.

"We are excited that this cutting-edge technology is up and running at our facility. The new robotic cell helps us to manufacture our plastic products more efficiently and safely, as well as allow us to expand our product lines. The addition to our facility was necessary to accommodate the growth of our company," states Tommy Wallace, President of Diversified Plastics.

Since 1976, Diversified Plastics has been the leading rotational molding manufacturer of custom and standard material handling carts and plastic storage containers. With two locations in Latta, South Carolina and Atlanta, Georgia, DPI specializes in material handling carts for the industrial, textile, hospitality, laundry, agricultural and marine industries, plus waste and recycling plastic containers for restaurants, sports venues and stadiums, apartment and condominium complexes, and corporate offices.

In addition to providing custom material handling solutions and custom molding for all types of industries, waste containers for any application, DPI's diverse product assortment includes bulk material handling carts, plastic utility carts, laundry carts, bulk containers, tote boxes, round containers, spring platform trucks, elevated carts, easy access carts, tilt trucks and more.
